# Das: Inflation expected to moderate from Sept

RBI governor says India's policy framework has evolved with changing nature of the economy

New Delhi, 5 September

eserve Bank of India (RBI) Governor Shaktikanta Das on Tuesday said inflation was expected to start moderating from September citing the recent fall in food prices.

His remarks, during a lecture at the Delhi School of Economics, come as the headline retail inflation number breached the upper tolerance of 6 per cent in July and stood at 7.4 per cent, the highest in 15 months. "Seasonality in food prices is one thing and this year it was tomatoes. Though vegetable prices are not expected to remain inflated for long, [we] expect the inflation to start moderating from this month forward," Das said.

Besides, in his address on the 'Art of Monetary Policy Making: The Indian Context', Das mentioned that, given the likely short-term nature of the vegetable price shocks, policy can await the dissipation of the first-round effects of such shocks, which may produce short-lived spikes in headline inflation. "(We) remain on guard to ensure that second-order effects in the form of generalisation and persistence are not allowed to take hold."

"The frequent incidences of recurring food price shocks pose a risk to the

anchoring of inflation expectations, which has been underway since September 2022. We will remain watchful of this as well."

The governor lauded the role of continued and timely supply-side interventions, as being undertaken by the government, which assumes criticality in limiting the severity and duration of food price shocks.

During the lecture, the governor said the monetary policy framework in India had evolved in line with developments in theory and country practices, the changing nature of the economy, and developments in financial markets.

# **RBI** may bring **CBDC** in call money market

The Reserve Bank of India (RBI) aims to increase the number of central bank digital currency (CBDC) transactions in the retail segment from 20,000-25,000 per day in July to 1 million by the end of December, according to official RBI sources. "The RBI is looking to expand the use of CBDC or e-rupee for a broader range of wholesale transactions. We are planning to use CBDC tokens for the call money market," NIKESH SINGH the official said.

targeting regime provides some useful lessons for the conduct of monetary policy. First, being proactive and nimble-footed during a crisis gives one the ability to respond speedily to fast-paced and overwhelming developments. Second, policy measures should be prudent, targeted, and calibrated to the needs of the hour without being tied down by any existing dogma or orthodoxy.

Third, monetary policy actions-when needed-should be backed up by appropriate regulatory and supervisory measures, including macro-prudential instruments, to reinforce the policy impact and its credibility," he said.

# Services PMI slows down in Aug

New Delhi, 5 September

Growth in India's dominant services sector lost some steam in August as the headline Purchasing Managers' Index (PMI) figure fell to 60.1 from a 13-year-high of 62.3 in July as sales slowed down amid a record increase in new export business, said a survey by S&P Global on Tuesday.

business "Total new increased for the twenty-fifth month in a row during August. Advertising and robust demand for services were among the reasons listed for growth. Although softer than in July, the overall expansion in sales was one of the strongest seen in 13 years," said the credit rating agency.

A reading above 50 in the survey indicates expansion of services activity and a figure below that suggests contraction. The survey polled around 400 companies in non-retail consumer services, transport, information, communication, finance, insurance, real estate, and business services.

It noted that despite a downturn in August, the index indicated one of the strongest increases in output seen since mid-2010 as survey respondents mentioned positive consumer appetite, favourable market conditions and successful events as the reason for this growth.

Pollyanna De Lima, economics associate director at Global Market Intelligence, said that Indian services companies achieved a milestone in August, as they clocked a record surge in new

export business. Asia Pacific, Europe, North America and the Middle East contributed to the

"This spike in international demand supported one of the sales performances recorded over the past 13 years, and acted as a catalyst for firms to expand their workforces as well as output. Demand strength also fostered a heightened sense of optimism regarding the outlook, boding well for economic growth prospects."

Services firms got new business despite hiking their charges as the overall rate of output price inflation quickened in August.

"Anecdotal evidence indicated that robust demand conditions facilitated the passing on of cost increases to clients. The overall rate of input price inflation remained above that seen for output charges, despite easing since July. Monitored companies suggested that food, input and labour costs all rose over the course of August," the survey said.

The rate of job creation was moderate as hiring activity across India's service economy continued to expand halfway through the second fiscal quarter as survey participants reported a blend of permanent and temporary staff recruitment on both part- and fulltime basis. The survey also mentioned that the monitored companies firmly believed that output would grow in the next 12 months as advertising, demand strength, plans to price competitively and a healthy number of client enquiries all boosted optimism in August.
