DETAILS OF SUBSIDIARY/ASSOCIATES/JOINT VENTURE COMPANY

Your Company does not have any subsidiary/associates/joint venture company as on March 31, 2019.

RESERVE BANK OF INDIA (RBI) CLASSIFICATION

The Reserve Bank of India (RBI) has classified your Company as an 'Asset Finance Company' within the overall classification of 'Non Banking Financial Institution'. However, pursuant to RBI circular on Harmonisation of different categories of NBFCs dated February 22, 2019, the three categories of NBFCs viz. Asset Finance Companies (AFC), Loan Companies (LCs) and Investment Companies (ICs) have been merged into a new category called NBFC - Investment and Credit Company (NBFC-ICC). Accordingly, your Company is presently classified as an 'NBFC - Investment and Credit Company (NBFC-ICC)'. The revised certificate from RBI is awaited.

SHARE CAPITAL

The Authorised Share Capital of your Company is Rs. 10,00,00,00,000/- (Rupees One Thousand Crores Only) divided into 50,00,00,000 Equity Shares of Rs. 10/- each and 5,00,00,000 Preference Shares of Rs. 100/- each and the paid-up Equity Share capital of your Company is Rs. 59.66 Crore (Rupees Fifty Nine Crore Sixty Six Lacs only). Presently, the entire paid-up Equity share capital of your Company is held by Srei Infrastructure Finance Limited alongwith their 6 (Six) nominees. There was no change in the Authorised and Paid-up Equity Share Capital of your Company during the year under review.

COMPOSITE SCHEME OF ARRANGEMENT AND AMALGAMATION

Your Company had filed a Draft Red Herring Prospectus (DRHP) dated November 28, 2017 with the Securities and Exchange Board of India (SEBI) and the Stock Exchanges for an Initial Public Offering of equity shares of your Company comprising a fresh issue aggregating to Rs.11,000 million and an offer for sale of upto 4,386,765 equity shares by Srei Infrastructure Finance Limited, Promoter of your Company. In principle approval for listing has been received from BSE Limited and National Stock Exchange of India Limited (NSE) on 15th December, 2017 and 26th June, 2018 respectively. Further, approval of the Draft Red Herring Prospectus (DRHP) was received from SEBI on 7th September, 2018 and is valid for a period of 12 (twelve) months from the date of the approval letter.

Further, the Board of Directors of your Company at its meeting held on January 21, 2019 approved a composite Scheme of arrangement and amalgamation amongst the Company, Srei Infrastructure Finance Limited (“Srei Infra”) (holding company), Srei Asset Finance Limited (“Srei Asset”) (fellow subsidiary) and respective shareholders and creditors under Sections 230 to 232 and other applicable provisions of the Companies Act, 2013 and rules made thereunder, which inert alia contemplates the following-

- (i) The demerger of the ‘*Lease Business*’ of your Company (the “Demerged Undertaking 1”) to Srei Asset pursuant to which Srei Asset will issue shares to the shareholder of your Company, i.e. SIFL (“Demerger 1”). There will be no change in the shareholding pattern of Company. The non-convertible debentures issued by your Company will stand cancelled and deemed to have been redeemed and the holders of such non-convertible debentures shall be issued new non-convertible debentures by Srei Asset on the same terms and conditions.
- (ii) On completion of Demerger 1, the remaining business undertakings of your Company (the “Amalgamating Undertaking”) will amalgamate with and into SIFL (“Amalgamation”). This being an amalgamation of a wholly owned subsidiary into its parent company, there will be no change in the shareholding pattern. On the transfer of the Amalgamating Undertaking becoming effective, your Company shall stand dissolved without being wound-up.
- (iii) On completion of the Amalgamation, the ‘*Lease Business*’, ‘*Rental Business*’ and ‘*Equipment Finance Business*’ of SIFL (the “Demerged Undertaking 2”) will demerge into Srei Asset (“Demerger 2”), pursuant to which Srei Asset will issue shares to the shareholders of SIFL. Pursuant to this, promoter and public shareholders of Srei Infra shall hold shares in Srei Asset in their existing proportionate shareholding and the existing shareholding of SIFL shall be diluted to 22 per cent.

The share exchange ratio for the Scheme was approved to be –

- in case of Demerger 1, 10 (ten) fully paid up equity shares of Srei Asset of Rs. 10 each shall be issued for every 21 (twenty one) fully paid up equity shares of Rs. 10 each held in your Company; and
- in case of Demerger 2, 1 (one) fully paid up equity share of Srei Asset of Rs.10 each shall be issued for every 5 (five) fully paid up equity shares of Rs.10 each held in SIFL. Intimation in regard to the Scheme has been made to the Reserve Bank of India (RBI) by your Company.

SIFL has filed an application under Regulation 37 of SEBI Listing Regulations, 2015 seeking no objection / observation letters from BSE Limited and National Stock Exchange of India Limited (“Stock Exchanges”). On receipt of no objection letters from the Stock Exchanges, SIFL shall file requisite application with the National Company Law Tribunal (“NCLT”) to seek its directions for convening meetings of the Shareholders and Creditors of SIFL. Subsequent to the receipt of such approvals, SIFL shall file a petition with the NCLT for its final approval to the Scheme.

Pursuant to the Scheme, the non-convertible debentures issued by your Company shall be transferred to Srei Asset. Accordingly, the non-convertible debentures issued by your Company will stand cancelled and deemed to have been redeemed and the holders of such non-convertible debentures shall be issued new non-convertible debentures by Srei Asset on the same terms and conditions, thereby not affecting the payment and redemption of such non-convertible debt securities.

PUBLIC ISSUE OF NON-CONVERTIBLE DEBENTURES (NCDs)

MANAGEMENT DISCUSSION AND ANALYSIS REPORT

ECONOMIC REVIEW

a. Global Outlook

According to the World Bank, global GDP is projected to grow at 2.9 per cent in 2019, lower than the 3 per cent growth achieved in 2018. World Bank expects global growth to slow down further to 2.8 per cent in 2020. The International Monetary Fund (IMF) global growth forecasts, although slightly better than that of World Bank, indicate a slowdown nonetheless. IMF expects global economy to grow by 3.3 per cent in 2019, which is the weakest since 2009, after an estimated growth of 3.6 per cent in 2018. IMF however predicts global growth to recover to 3.6 per cent in 2020. Global economic growth has been slowing down since the second quarter of 2018 and there are no immediate signs of a pick-up. Growing trade tensions have contributed largely to this global slowdown.

The US economy registered strong growth in 2018, riding on the stimulus provided in terms of tax cuts. However, the positive effects of that stimulus seem to be fading and the US economy can slow down in the second half of 2019. The protectionist stance of the world's biggest economy is causing trade friction. China, Europe, Japan, Mexico India, and many others stand affected. Some of the affected nations have already started retaliating by imposing higher tariffs on goods exported by US. This, if continued, will have wider ramifications across the entire global supply chain.

There has been a sharp downturn in growth in Europe as well. The 19-nation Euro Area is experiencing a contraction in domestic demand along with a steep drop in industrial production. Germany and France together account for almost half of the Euro Area economy. Germany is experiencing a protracted slump in manufacturing, while household spending in France has remained virtually stagnant. The other major economy, Italy, is in a recession. In the UK, the uncertainty over Brexit continues to linger, but the possibility of a "hard Brexit" seems to have been averted, with the European Union extending the deadline for UK's departure to 31st October, 2019.

Japan experienced impressive growth in 2017, but thereafter there has been a deceleration in consumer spending, investment and export throughout 2018. With no improvement in the various macroeconomic parameters, growth is likely to remain muted in 2019.

Several of the major emerging market and developing economies (EMDEs) like China, Russia, Brazil and South Africa have slowed down on account of subdued domestic and global demand. A new round of stimulus focussing on infrastructure creation is expected to revive growth in China. But inspite of the relative slowdown, it is the EMDEs which are expected to be the main drivers of global growth in 2019. According to World Bank forecasts, the EMDEs, after registering a 4.2 per cent growth rate in 2018, will clock another 4.2 per cent growth rate in 2019 and thereafter growth rate will strengthen to 4.5 per cent in 2020. Meanwhile, the advanced economies (AEs), after registering a growth of 2.2 per cent growth rate in 2018, are

expected to decelerate to 2.0 per cent growth in 2019 and further slow down to 1.6 per cent in 2020.

While the international crude prices have continued to firm up during the year under review, this is unlikely to continue. A global slowdown will adversely impact international commodity prices, especially crude and industrial metals.

One positive development is the change in stance of the main central banks which had earlier started winding down the quantitative easing undertaken in the aftermath of the global financial crisis of 2008. The US Federal Reserve had started raising interest rates since 2015 which continued until last year, but its recent announcements indicate a switch to a more accommodative strategy. Bank of Japan is continuing with its asset purchase agenda and a negative interest rate policy. European Central Bank, after tapering its stimulus, has expressed its intent to keep interest rates low and, if situation demands, is even open to restart its bond purchase programme.

b. Indian Scenario

The Indian economy continues to be a bright spot in the world map. For one more year India has held on to its position of the fastest growing major economy in the world. According to Central Statistics Office (CSO), for 2018-19, India's GDP growth rate has been estimated to be 7.0 per cent, down from the 7.2 per cent achieved in 2017-18. According to IMF, India's GDP growth rate is expected to pick up to 7.3 per cent in 2019 and to 7.5 per cent in 2020. According to estimates by Asian Development Bank (ADB) and Reserve Bank of India (RBI), the Indian economy will grow at 7.2 per cent in 2019-20. However, it is worth noting that IMF, ADB, RBI and CSO have reduced their growth forecasts for India in the wake of recent developments. In the October-December quarter of 2018, Indian economy grew at 6.6 per cent, its slowest in last five quarters.

Several high frequency indicators are indicating a slowdown in the economy. In February, 2019, the industrial output growth slowed to a 20-month low of 0.1 per cent, mainly due to contraction in the manufacturing sector. During April-February 2018-19, the Index for Industrial Production (IIP) grew at 4 per cent as against 4.3 per cent in the same period of 2017-18. Capital goods output contracted by 8.8 per cent in February 2019 indicating a major slowdown in investment. Sales of commercial vehicles also contracted during February. Credit flow to micro, small and medium enterprises (MSMEs) remained tepid. While all these may indicate another slow quarterly GDP growth for January-March 2019, this slowdown may be temporary and can be attributed to the upcoming General Elections. Once there is clarity on the composition of the next government, investments can once again pick up.

During the year under review, the Indian economy overtook France to become the world's sixth largest economy. India also moved up to 77th position in the World Bank's 'Ease of Doing Business' survey, up by 53 places in the last two years. The India growth story has remained attractive to the global investor community. Inflow of foreign direct investment (FDI) has remained steady. After recording a total FDI (equity + re-invested earnings + other capital) inflow of USD 61 billion in 2017-18, India has managed to attract FDI worth USD 46.6 billion during April-December 2018. Another notable achievement for the economy during the year under review is the total exports (goods and services combined) surpassing the USD 500 billion mark for the first time. While India, like many other EMDEs, can get affected by global developments, the foreign exchange reserve of USD 415 billion provides adequate buffer.

The government has been on the forefront of stepping up investment for the infrastructure sector. Private sector participation in infrastructure investment is yet to pick up despite a number of initiatives taken by the government.

Considerable progress has been made on the roll-out of the Goods & Services Tax (GST). Though the GST regime is still evolving, it has been successful in expanding the tax base and in drawing much of the erstwhile informal activity into the formal sector. With further rationalization of tax rates and expanding the coverage of GST to all sectors, entrepreneurship is likely to take off in a big way.

The jurisprudence in Insolvency and Bankruptcy Code (IBC) is still evolving, but it has ushered in a whole new credit culture in the Country. The evolving and maturing of the IBC will address the ‘twin balance sheet’ problem more comprehensively. However, going forward, this must be followed up with structural reforms in the banking sector in order to improve the process of credit intermediation.

The domestic challenges are not insurmountable. The overall business environment today is much better than what it was during the last few years. The management of your Company is upbeat about India’s prospects and is convinced that India will continue to surge ahead of its peers.

NBFCs IN INDIA

Over the years, NBFCs have played a key role in catering to the credit needs of the unbanked segment of the society in urban and rural areas. They have been instrumental in the growth and development of important sectors of the economy like Micro, Small and Medium Enterprises (MSMEs), infrastructure, transport and agriculture. Deep rooted knowledge and of their domain, thorough understanding of the local market dynamics, flexibility in operations based on the needs of the borrowers and ability to innovate within the regulatory framework, have enabled NBFCs to not only withstand the turbulent times but also show impressive growth over the years. The “personal touch” that NBFCs provide to the borrowers make them the preferred choice. The Financial Stability Report published by RBI dated December, 2018 presented an extremely impressive and healthy picture of NBFCs. As on 30th September, 2018, the key highlights of the are:

| Description | Y-O -Y Growth (%) |
|--|--------------------------|
| Growth in aggregate balance sheet size | 17.21 |
| Net Profit | 16.02 |
| Growth in Land and Advances | 16.30 |
| Return on Assets | 1.80 |
| Return on Equity | 4.40 |
| Gross NPA | 6.10 |
| Capital Adequacy (CRAR) | 21.00 |

The aggregate Balance Sheet size of the NBFC sector stood at Rs. 26 Lakh crores as on 30th September 2018.

The IL&FS default in September, 2018 resulted in one of the major turbulence in the sector, with doubts being cast on the solvency of NBFCs, due to the so called Asset Liability mismatch. However, the concerns were limited to the company in question, as a one off case, and were certainly not relevant for the entire NBFC sector. But this created one of the most

challenging scenarios for NBFCs in their life time, where liquidity suddenly dried up and there was a major funding crunch in the market, driven by a sudden change in perception and the stance taken by banks towards funding of NBFCs.

The RBI did intervene to ease the situation by not only making the required regulatory changes but also engaging actively with the major players.

During the year under review, RBI made the following amendments to the regulatory framework for NBFCs:

- All banks, NBFCs and payment system providers were prohibited from dealing in virtual currencies.
- All exemptions granted to Government owned NBFCs were withdrawn, and as a result, they are also subject to all the regulatory norms as applicable to privately owned NBFCs.
- Systemically Important Core Investment Companies (CIC-NDSI) were permitted to hold the units of Infrastructure Investment Trust (Inv IT) as a sponsor.
- To encourage formalization and growth of MSMEs, banks and NBFCs were temporarily allowed to classify their exposure as per the 180 days past due criteria, to all MSMEs, including those not registered under GST, as a standard asset.
- Co-origination of loans by banks and NBFCs (NBFC-NDSIs) for lending to the priority sector.
- To provide liquidity, single borrower exposure limit for bank funding to NBFCs was increased from 10% to 15% of capital funds upto 31st December, 2018 and further extended to 31st March, 2019.
- Banks were allowed to treat their additional exposure (credit) to NBFCs and Housing Finance Companies (HFCs) as level 1 high quality liquid assets (HQLA) within the mandatory Statutory Liquidity Ratio (SLR) requirement.
- Securitization guidelines to NBFCs were relaxed, where the Minimum Holding Period (MHP) requirement in respect of loans of original maturity above 5 years, was reduced from 12 months to 6 months.
- Banks were allowed to provide Partial Credit Enhancement (PCE) to bonds issued by NBFC- NDSIs and HFCs.
- External Commercial Borrowings (ECB) framework was substantially relaxed in terms of eligible borrowers, recognized lenders, minimum average maturity period and merging of Tracks I and II as foreign currency denominated ECB and merging of Track III as rupee denominated ECB. ECB up to USD 750 Million permitted under the automatic route.
- Onetime restructuring of existing loans to MSMEs without a downgrade in the asset classification.
- With the objective of harmonization of different categories of NBFCs, Asset Finance Companies (NBFC-AFCs), Loan companies (NBFC-LCs) and Investment Companies (NBFC-ICs) have been merged into one new category called Investment and Credit Company (NBFC-ICC).
- NBFC- NDSIs are covered under the Government of India's Interest Subvention Scheme for MSMEs.
- All bank exposures (funding) to all NBFCs except Core Investment Companies (CICs) will be risk weighted as per the ratings assigned by accredited credit rating agencies.

Your Company played a pivotal role in taking up the challenges faced in the wake of the recent crisis. Your Company has been the flag bearer for the sector and engaged both with RBI,

Ministry of Finance and the historic and first of its kind meeting of the NBFC sector with the Hon'ble Prime Minister.

BUSINESS OUTLOOK AND FUTURE PLANS

During the year under review, the government continued its efforts towards enhancing India's attractiveness as an investment destination which resulted in:

- India climbing up 23 positions (from 100th in 2017 to 77th in 2018 among 190 countries) in the World Bank's Ease of Doing Business Index
- India moving up 5 places (from 63rd in 2017 to 58th in 2018) in the Global Competitiveness Index of the World Economic Forum
- India's rank improving from 60th in 2017 to 57th in 2018 on the Global Innovation Index of World Intellectual Property Organization.

In order to sustain the growth momentum and to create jobs, the government has been proactively spending on infrastructure creation. According to the Interim Budget 2019-20, the total capital outlay for infrastructure in 2019-20 has been kept at Rs. 4.7 trillion (approximately USD 70 billion). Among infrastructure segments, railways and roads are the biggest beneficiaries for 2019-20.

For 2019-20, the railways are to undertake the highest-ever capital expenditure of Rs. 1.58 trillion (approximately USD 22 billion) which also involves an all-time high budgetary support of Rs. 646 billion (approximately USD 9 billion).

In the Interim Budget, Pradhan Mantri Gram Sadak Yojana (PMGSY), the flagship programme to construct rural roads, has been allocated Rs.19,000 crore (approximately USD 2.7 billion).

Other than these, the Interim Budget mentioned the plan to create one lakh digital villages over the next 5 (five) years and also announced a number of initiatives aimed at bolstering the rural infrastructure that will encourage entrepreneurship. In addition, the decision to exempt levy of notional income on a second property owned by a tax-payer is expected to provide a boost to the housing sector.

The year under review also witnessed several notable developments in the infrastructure sector:

- The average pace of highway construction scaled a new high of 30 km / day, with the average touching a record high of 31.87 km / day in December, 2018. With the HAM (hybrid annuity model) and EPC (engineering-procurement-construction) taking care of most of the construction risk, private sector participation in highway projects is growing. This augurs well for the Bharatmala programme under which 34,800 km of highways are being constructed at a cost of Rs. 5.35 trillion (USD 77 billion).
- The Sagarmala programme, which entails projects involving port modernisation, capacity augmentation, port connectivity (including coastal shipping and inland waterways), port-led industrialisation and development of coastal communities, involves investments of over Rs. 8 trillion (approximately USD 114 billion).
- With rising levels of income and affordability, air traffic is growing fast in India. While 103 airports are operational now, India is expected to require 150-200 airports by 2035. Under the UDAN (Ude Desh ka Aam Nagrik) scheme, India is expected to add 75 airports in the next 3-4 years.

In addition, during the year under review, the government has introduced a National Mineral Policy (for non-fuel and non-coal minerals), a Hydro Power Policy and a National Digital Communication Policy. These, along with some more sector-specific announcements in the Union Budget 2019-20 (once the new government takes office), are likely to set in motion the conceptualization and implementation of more infrastructure projects. Thus, there will be a steady pipeline of infrastructure projects in the years to come.

Due to the government's focus on initiating policies and projects to ensure the creation of a world class infrastructure in India, demand for infrastructure equipment is expected to multiply as observed over the last three years. According to Feedback Consulting, the CME industry is expected to grow at a CAGR of 14-15 per cent for next three years until Fiscal 2021. The overall construction equipment industry is expected to reach 153,000 units by Fiscal 2021 and the market for new equipment finance market will continue to have a share between 85-87 per cent for the next three years. Feedback Consulting anticipates CME financing industry to grow at a CAGR of 20-21 per cent between Fiscal 2018 and Fiscal 2021. Apart from demand for construction, mining and allied equipment, a spurt in demand for agriculture and healthcare equipment is also expected. All these open up huge opportunities for your Company.

Your Company is actively tracking all these developments and the management is confident that the business scenario will improve significantly during FY 2019-20.

BUSINESS REVIEW

Your Company is registered with the Reserve Bank of India (RBI) as a systemically important non-deposit taking NBFC and is the leading financier in the Construction, Mining and allied Equipment ("CME") sector in India. In addition to CME, your Company is also diversified into financing of tippers, IT and allied equipment, medical and allied equipment, farm equipment and other assets. The financial products and services comprise loans, for new and used equipment, and leases.

Infrastructure sector has been a key driver for the Indian economy. Government is working towards enhancing India's attractiveness as an investment destination. In order to sustain the growth momentum, government has been spending on infrastructure creation. In the recent years, Indian infrastructure has been enjoying high budgetary allocation, increased number of deals, increased participation from the private sector, and greater foreign direct investment (FDI) in the sector.

In the interim Union Budget 2019-20, sectors such as railways, housing and urban affairs, and roads and highways have witnessed increased year-on-year (y-o-y) allocations (excluding Internal and Extra Budgetary Resources (IEBR)) by 21 per cent, 12 per cent, and 6 per cent respectively. The north east sector has received a special focus in the Interim Budget with an allocation of Rs. 58,166 crores, an increase of 21 per cent over the previous budget.

Amid the increased focus of the government in the infrastructure sector, the Indian infrastructure equipment sector is undergoing sweeping changes not just in terms of higher demand, but also due to the digitalization and intelligentization of manufacturing for rolling out highly advanced equipment. In view of the projected growth and government's 'Make in India' initiative, most Original Equipment Manufacturer (OEMs) are upgrading their manufacturing facilities in an intelligent and innovative way by using automation, robotic, and advanced technologies; producing high-tech machines that meet global quality standards.

The construction, mining, and allied equipment (CME) industry is estimated to have grown by approximately 10 per cent year-on-year in Fiscal 2019 in terms of unit sales.

During the first half of the year under review, your Company's disbursement grew to Rs. 8,572 crores compared to Rs. 8,309 crores in the same period in the previous year. The Gross Non-Performing Assets (GNPA) and Net Non-Performing Assets (NNPA) reduced to 3.20 per cent and 1.93 per cent in the first half of the period under review compared to 4.93 per cent and 3.23 per cent, respectively, in the same period last year. In the first half of the year, your Company's total income and net profit grew by 35 per cent and 86 per cent, respectively, over the corresponding period in the previous financial year.

In the aftermath of the NBFC crisis that unfolded across India's financial system in September 2018, liquidity was constrained in general across NBFCs. There was a marked slowdown in the second half of the year under review that resulted in a decline in disbursements to Rs. 5,109 crore compared to Rs. 8,680 crore during the same period in the previous year. In this second half of the year under review, there was a growth in your Company's total income by 21 per cent year-on-year and net profit declined 43 per cent year-on-year.

The consolidated impact of both the halves of the 2018-19 review period led to an increase of profit before tax and profit after tax by 3 per cent and 4 per cent, respectively, to Rs. 457 crores and Rs. 306 crore, respectively. The total Asset under Management (AUM) grew to Rs. 32,226 crores, representing an 8.93 per cent growth over last year. The Capital Adequacy Ratio (CAR) remained compliant at 16.08 per cent. In this challenging environment, your Company has focused on diversifying the liability portfolio to enhance liquidity for future growth and is re-engineering the business model through multiple stake holder partnerships with an endeavour to make the model sustainable.

In the forthcoming year, your Company would continue to leverage its growth opportunities through its latest capital light co-lending business model with both, public sector and the private sector banks which will enable your Company to access enhanced liquidity as well as allow the company to collaborate and widen its market and customer base, thereby helping it maintain its strong market position. While banks will have access to your Company's strong customer relationships, OEM relationship and programs, domain expertise, risk prognosis tools arising out of three decades of experience and the company's tested process and policies; it shall also offer customers a win-win scenario with access to affordable financial solutions and other banking products under one umbrella. This model will also enable your Company to maximize fee income and maintain cost efficiency, thereby helping it deliver improved performance matrices. The co-lending arrangement shall operate through a digital platform for loan origination, loan dues collection, auction of equipment, valuation of equipment and several other facilities. Meanwhile, your Company shall continue to conduct direct lending and leasing business activities with its SME and strategic customers. Further, your Company will remain focussed on upgrading its existing IT capabilities with automated, digitised and other technologically-enabled platforms.

RESOURCES

The year under review, especially second half of the year, was very critical & challenging for the Treasury department of your Company. The Treasury team of your Company has done exceptionally well by maintaining sufficient liquidity to ensure timely repayment obligations and business continuity. The strong Asset Liability Management Policy of your Company and efficient management of available resources has helped to sail through the tsunami in the financial market during the second half of the last fiscal.

i. Loans from Banks

The domestic resource mobilization team (unit of Liability & Treasury Management Group) of your Company has been able to leverage its long & strong relationship with all the public & private sector banks and financial institutions operating in the Country. The tied-up Cash Credit limits of your Company stood at Rs. 11,320 Crores from a consortium of banks. During the year, fresh Term facilities of Rs. 2,462.50 Crores were raised from various domestic banks and financial institutions.

ii. Securitisation / Assignment of Loan Portfolio

Securitization / Assignment of receivables have been significant source of liquidity for your company. During the year, your Company had securitised / assigned loans to the extent of Rs. 5,683 Crores. Further, your Company has also assigned lease receivables aggregating to Rs. 141.50 crores during the year, in order to augment funds. The loan assets assigned have been de-recognized in the books of your Company as per extant RBI guidelines on securitisation of standard assets and applicable accounting standards.

iii. Short Term Loans & Commercial Paper

The issuances of Commercial Papers (CPs) and availing Short term loans from banks by earmarking Cash credit limits, helps your Company to bring down the cost of working capital. During the year, your Company issued CPs to Mutual Funds, Banks and other investors and also raised short term loans from banks by earmarking of cash credit limits.

iv. Private Placement of Non-Convertible Debentures (NCDs)

Your Company has done reasonably well in augmenting the long term resources and increasing the capital base through raising Perpetual Debt of Rs. 100 crores and Subordinated Debt for an amount aggregating to Rs. 55 Crores during the year. Further, an amount of Rs. 314 crores have also been raised through issuance of Secured NCDs on private placement basis from institutional investors during the year.

v. International Borrowings:

Similar to FY 2017-18, in FY 2018-19 Foreign Currency loans to the equivalent of USD 80.91 million amounting to Rs. 549.52 crores was drawn down. The hedge cost of these loans along with the loan cost helped in bringing down the overall cost of funds. Since buyers credit i.e. short term foreign currency trade credit was banned by RBI in March, 2018, your Company was unable to raise funds through this short term source. However relaxation in this segment has come and in future your Company will look to raise resources in short term foreign currency trade credit apart from longer tenor External Commercial borrowings.

RISK MANAGEMENT

Management of risk remains an integral part of your Company's operations and it enables your Company to maintain high standards of asset quality at time of rapid growth of its lending business. The objectives of risk is to maintain robust asset quality alongside growth in business, optimal allocation of capital simultaneously with enhancement of shareholders' value and hedging against unforeseen events and macro-economic or environmental conditions.

Your Company has constituted a Risk Committee of the Board which meets every quarter to deal with such matter as may be referred to by the Board of Directors from time to time. Your Company's risk management strategy is based on a clear understanding of various risks, and adherence to well-laid out risk policies and procedures that are benchmarked with industry best practices. Your Company has a defined Risk policy for risk management which aims to put in place a robust risk management framework to help in achieving the objectives. The broad objective of the Committee is to identify and assess various risks of your Company, to strengthen the risk management practices and compliance framework of your Company, to evaluate the effectiveness of mitigating strategies periodically to address material risks, to review any material findings and recommendations of the Risk Department and prescribe and monitor appropriate action to address the identified gaps.

Risk is managed through a framework of policies and principles approved by the Board of Directors supported by an independent risk function which ensures that your Company operates within a pre-defined risk contours. The risk management function strives to proactively anticipate vulnerabilities at the transaction as well as at the portfolio level, through quantitative or qualitative examination of the embedded risks and put in place mitigants through change in policies and enhanced process controls.

Governance Structure

The risk strategy of your Company is enunciated and overseen by the Risk Committee of the Board (RCB) mentioned above, an independent Board level sub-committee that strives to put in place specific policies, frameworks and systems for effectively managing the various risks. Policies approved from time to time by the Board of Directors or the RCB in consultation with other sub-committees of the Board, viz. Asset Liability Management Committee (ALCO) and Credit & Investment Committee, constitute the governing framework for various types of risk and business activities undertaken within this policy framework. Overall risk management is guided by well-defined procedures appropriate for the assessment and management of individual risk categories viz. credit risk, asset risk, treasury & market risk, operational risk, liquidity risk and counterparty risk supplemented by periodic validations of the methods used. Under the guidance of RCB, the risk department is responsible for assessing and managing risks on a regular and dynamic basis. This entails, as an imperative, garnering adequate knowledge of macroeconomic trends, insights into dynamics of various sectors, understanding of regulatory environment and application of quantitative and qualitative tools facilitating an accurate assessment of risk at all times.

Credit Risk

Risk aims at mitigating the credit risk by client grading, developing scoring models, doing an industry analysis to which the client belongs, existing portfolio analysis, regional analysis, and review of credit files. The credit proposals are vetted to provide views on the future outlook of the sector/segment for short to medium term with particular emphasis on various geographies and asset classes. The perspective of governmental support, regulatory issues, growth trend &

demand potential, capital intensity & back-up, competition, recoverability of receivables, and other parameters impacting credit quality are analyzed to arrive at a risk aware and risk integrated decision. Your Company has a strong framework for the appraisal and execution of financing transactions that involves a detailed evaluation of commercial, financial, marketing and management factors of the borrower depending upon the constitution of the borrower, the size of the exposure and the complexity of the transaction, including sponsor's financial strength and experience.

Asset Risk

As an asset financing company, one of the key elements for assessing the underlying transaction risk is the intrinsic value of the asset being financed through the life of the financial facility extended. Risk department monitors the intrinsic value of assets being financed across the financing life cycle.

Portfolio Risk

The portfolio risk is assessed through various analytical tools to help in portfolio monitoring via reflection of trends, ratios, Actual v Budgeted etc. Various models are developed to understand the behaviour pattern of the portfolio to mitigate the risk arising from the same. The patterns of the past data is analysed to determine the probability in the future. Your Company periodically reviews the impact of the stress scenarios resulting from rating downgrades or drop in the asset values in case of secured exposures on the portfolio. Your Company works within prudential limits of exposure to single borrower and borrower groups, industry sectors and geographies, and regularly tracks portfolio level concentrations. These limits are periodically reviewed based on changes in macro-economic environment, regulatory environment and industry dynamics. Existing credit exposure in the portfolio is continuously monitored and reviewed. Key sectors are analysed in details to suggest strategies considering both risks and opportunities. Wherever required, corrective action is taken based on portfolio analysis and early warning signals.

Treasury Risk

As an integral part of the overall risk management system, your Company addresses different forms of market risks, viz., liquidity risk, capital risk, interest rate risk and foreign exchange risk. Capital risk is generally defined as an enterprise's access to cash at any given time and balancing this with its efficient use. Your Company involves in assessing the overall cash flow position of the company on a monthly basis over a horizon of one year comprising maturity profile of all liabilities, amortization of credit portfolio and targeted disbursement. Thereafter, the net position is sensitized with lower collection rate, based on the prevailing trend & emerging scenario for various business verticals through scenario analysis. Liquidity risk is two-dimensional: risk of being unable to fund portfolio of assets at appropriate maturity and rates (liability dimension) and the risk of being unable to liquidate assets in a timely manner at a reasonable price (asset dimension). Your Company's Asset Liability Management Committee (ALCO) lays down a broad framework for liquidity risk management to ensure that it is in a position to meet its daily liquidity obligations as well as to withstand a period of liquidity stress from industry, market or a combination of them. The liquidity profile is analyzed on a static as well as on a dynamic basis by using the gap analysis technique supplemented by monitoring of key liquidity ratios and conduct of liquidity stress tests periodically. Interest rate risk is the probability that variations in the interest rates will have a negative influence on the quality of a given financial instrument or portfolio, as well as on your Company's condition as a whole. Interest rate risk is generally

managed through floating rate mechanism by linking the lending rate of interest to your Company's benchmark rate and is reviewed periodically with changes in your Company's cost of funds. Your Company conducts stress testing at periodical intervals to monitor vulnerability towards unfavourable interest rate movements. Exchange rate risk management becomes necessary as your Company borrows money in foreign currency and lends in domestic currency. In order to optimize the cost of funds, your Company adopts effective hedging strategies considering the overall risk appetite of your Company. Your Company measures, monitors and controls exchange rate risk through statistical measures.

Operational risk

Operational risk is defined as the risk of loss arising out of inadequate or failed internal processes, people and systems or from external events. This risk should be managed in the sense that it must be contained within acceptable limits by means of avoidance, reduction or transfer actions. Your Company involves in development of various policies, second level controls and risk control matrices to mitigate errors. Your Company ensures that the companies anti money laundering procedures are implemented, effective, and compliant with the latest statutory regulations. It involves in setting up of a consistent system throughout the company, with an adequate level of formalization and traceability that will serve to provide management, the board of directors, and regulatory bodies with reasonable assurance of risk control. Your company has a Business Continuity Plan (BCP) is in place which ensures business continuity in unlikely event of disaster or disruption. Further to provide continued and uninterrupted service even during natural disasters, a Disaster Recovery (DR) plan has also been put in place. **INDEPENDENT AUDITOR'S REPORT
TO THE BOARD OF DIRECTORS OF
SREI EQUIPMENT FINANCE LIMITED**

1. We have audited the accompanying Statement of Financial Results of **Srei Equipment Finance Limited** ("the Company"), for the year ended 31 March, 2019 ("the Statement"), being submitted by the Company pursuant to the requirement of Regulation 52 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as modified by Circular No. CIR/IMD/DF1/69/2016 dated August 10, 2016 in continuation to circular CIR/CFD/FAC/62/2016 dated July 5, 2016.
2. This Statement, which is the responsibility of the Company's Management and approved by the Board of Directors, has been compiled from the related standalone Ind AS financial statements which has been prepared in accordance with the Indian Accounting Standards prescribed under Section 133 of the Companies Act, 2013 read with relevant rules issued thereunder ('Ind AS') and other accounting principles generally accepted in India. Our responsibility is to express an opinion on the Statement based on our audit of such standalone financial statements.
3. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the Statement is free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the Statement. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Statement, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the Statement in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Management, as well as evaluating the overall presentation of the Statement.

We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion.

4. In our opinion and to the best of our information and according to the explanations given to us, the Statement:
- (i) is presented in accordance with the requirements of Regulation 52 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as modified by Circular No. CIR/IMD/DF1/69/2016 dated August 10, 2016 in continuation to circular CIR/CFD/FAC/62/2016 dated July 5, 2016; and;
 - (ii) gives a true and fair view in conformity with the aforesaid Indian Accounting Standards and other accounting principles generally accepted in India of the net profit and Total comprehensive income and other financial information of the Company for the year ended March 31, 2019.
5. The Statement includes the results for the half year ended March 31, 2019 being the balancing figure between audited figures in respect of the full financial year and the published year to date figures up to half year of the current financial year which were subject to limited review by us.

**INDEPENDENT AUDITOR'S REPORT
To The Members of SREI Equipment Finance Limited
Report on the Financial Statements**

Opinion

We have audited the accompanying financial statements of **SREI Equipment Finance Limited** ("the Company"), which comprise the Balance Sheet as at 31 March 2019, and the Statement of Profit and Loss (including Other Comprehensive Income), the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and a summary of the significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2019, and its profit, total comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing specified under Section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibility for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

Other Information

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Director's report, but does not include the financial statements and our auditor's report thereon. The Director's report is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Ind AS and other accounting principles generally accepted in India.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in the "Key Audit Matters" section of our report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse

consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by Section 143(3) of the Act, based on our audit, we report that:
- a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - c) The Balance Sheet, the Statement of Profit and Loss including Other Comprehensive Income, the Cash Flow Statement and Statement of Changes in Equity dealt with by this Report are in agreement with the books of account.
 - d) In our opinion, the aforesaid financial statements comply with the Indian Accounting Standards prescribed under section 133 of the Act.
 - e) On the basis of the written representations received from the directors of the Company as on 31 March 2019 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2019 from being appointed as a director in terms of Section 164(2) of the Act.
 - f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A". ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **SREI EQUIPMENT FINANCE LIMITED** ("the Company") as of 31 March, 2019 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

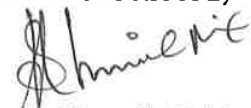

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March, 2019, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

SREI EQUIPMENT FINANCE LIMITED

NOTES TO THE FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31st MARCH, 2019

1. GENERAL INFORMATION

Srei Equipment Finance Limited, a wholly owned subsidiary of Srei Infrastructure Finance Limited, is a Public Limited Company domiciled in India and incorporated under the provisions of the Companies Act, 1956. The addresses of its registered office and principal place of business are "Vishwakarma", 86C, Topsia Road (South), Kolkata- 700046. The Company had received a Certificate of Registration from the Reserve Bank of India ('RBI') on 3 September, 2008 to commence / carry on the business of Non-Banking Financial Company ('NBFC') without accepting public deposits, classified as Systemically Important NBFC (NBFC-NDSI). Subsequently, the Company has been issued a new certificate by the RBI dated 19th February, 2014 consequent to conversion from Private Limited Company to Public Limited Company.

2. SIGNIFICANT ACCOUNTING POLICIES

2.1 Basis of preparation and presentation

In accordance with the notification issued by the MCA, the Company has adopted Indian Accounting Standards (referred to as "Ind AS") notified under Section 133 of the Companies Act, 2013 ("the Act") read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, from 1st April, 2018 and the effective date of such transition is 1st April, 2017. Such transition has been carried out from the erstwhile Accounting Standards notified under the Act, read with relevant rules issued thereunder (collectively referred to as "Previous GAAP").

Previous period numbers in the financial statements have been restated to Ind AS. In accordance with Ind AS 101 First-time Adoption of Indian Accounting Standard, the Company has presented a reconciliation from the presentation of financial statements under Previous GAAP to Ind AS of shareholders' equity as at 31st March, 2018 and 1st April, 2017 and of the comprehensive income for the year ended 31st March 2018. Refer Note 2.22 for the details of first-time adoption exemptions availed by the Company and Note 37 for Reconciliation of Equity and Total Comprehensive Income for numbers reported under Previous GAAP to Ind AS.

These financial statements have been prepared on the historical cost basis, except for certain items which are measured at fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

The preparation of financial statements require the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities, revenue and expenses and disclosed amount of contingent liabilities. Areas involving a higher degree of judgement or complexity or areas where assumptions are significant to the Company are discussed in 2.23 Critical accounting judgement and key sources of estimation uncertainty.

The management believes that the estimates used in preparation of financial statements are prudent and reasonable. Actual results could differ from those estimates and the differences between the actual results and the estimates would be recognised in the periods in which the results are known/ materialised.

Comparative information has been restated to accord with changes in presentations made in the current year, except where otherwise stated.

The accounting policies for specific financial report items are disclosed in the respective notes. Other significant accounting policies and details of critical accounting assumptions and estimates are set out below.

2.2 Revenue recognition

Revenue is recognized to the extent it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.

Revenue from Operations is recognized in the Statement of Profit and Loss on an accrual basis as stated herein below:

- (a) Income for financial assets other than those financial assets classified as at Fair value through profit and loss ("FVTPL") is recognized based on the effective interest rate method. Income from Credit Impaired Financial Assets is recognized on net basis i.e. after considering Impairment Loss Allowance.
- (b) Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Company's net investment outstanding in respect of the leases.
- (c) Interest income on fixed deposits/margin money/pass through certificates is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable.
- (d) Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease, unless another systematic basis is more representative of the time pattern in which the benefit derived from the leased asset is diminished or the rentals are structured solely to increase in line with expected general inflation to compensate for the Company's expected inflationary cost increases.
- (e) Referral income and others income is recognized when it becomes due under the term of relevant mutually agreed arrangement.
- (f) Income from dividend is recognized when the Company's right to receive such dividend is established, it is probable that the economic benefits associated with the dividend will flow to the entity, the dividend does not represent a recovery of part of cost of the investment and the amount of dividend can be measured reliably.
- (g) Revenue from sale of power is recognised to the extent of the Company's share of income of the jointly controlled operations arising out of sale of units generated as per the terms of the respective power purchase agreements with the State Electricity Boards.
- (h) In case of assignment transactions, as the Company retains the contractual right to receive some of the interest amount due on the transferred assets, the present value of such interest receivable is recorded as 'Interest retained on pools assigned' with corresponding gain recognized in the Statement of profit and loss.

2.3 Financial Instruments

2.3.1 Recognition of Financial Instruments:

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the financial instruments. Loans & advances and all other regular way purchases or sales of financial assets are recognised and derecognised on the trade date.

2.3.2 Initial Measurement of Financial Instruments:

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at FVTPL) are added to or deducted from their respective fair value on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognised immediately in statement of profit and loss.

2.3.3 Subsequent Measurement:

(A) Financial Assets

Financial Assets carried at Amortised Cost (AC):

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial Assets at Fair Value through Other Comprehensive Income (FVTOCI):

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets measured at FVTOCI are subsequently measured at fair value. Interest income under effective interest method, foreign exchange gains and losses and impairment are recognised in the statement of profit and loss. Other net gains and losses are recognised in Other Comprehensive Income (OCI). On derecognition, gains and losses accumulated in OCI are reclassified to the statement of profit and loss.

Financial Assets at Fair Value through Profit or Loss (FVTPL):

A financial asset which is not classified in any of the above categories are measured at FVTPL. A financial asset that meets the amortised cost criteria or debt instruments that meet the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases. The Company has not designated any debt instrument as at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognised in statement of profit and loss.

Effective Interest Rate (EIR) Method:

The Effective Interest Rate Method is a method of calculating the amortized cost of a debt instrument and of allocating interest income or expense over the relevant period. The Effective Interest Rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of a financial asset or to the amortised cost of a financial liability on initial recognition

Impairment of Financial Assets:

The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, debt instruments at FVTOCI, lease/trade receivables, other contractual rights to receive cash or other financial asset, and financial guarantees not designated as at FVTPL.

The Company measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses.

When making the assessment of whether there has been a significant increase in credit risk since initial recognition, the Company uses the change in the risk of a default occurring over the expected life of the financial instrument instead of the change in the amount of expected credit losses. To make that assessment, the Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information,

that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition.

In case of debt instruments at FVTOCI, the loss allowance measured in accordance with the above requirements is recognised in other comprehensive income with a corresponding effect to the statement of profit and loss but is not reduced from the carrying amount of the financial asset in the balance sheet; so the financial asset continues to be presented in the balance sheet at its fair value.

No Expected credit losses is recognised on equity investments.

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 115, the Company measures the loss allowance at an amount equal to lifetime expected credit losses.

Further, for the purpose of measuring lifetime expected credit loss allowance for trade receivables, the Company has used a practical expedient as permitted under Ind AS 109. The expected credit loss allowance is computed based on a provision matrix which takes into account historical credit loss experience

Derecognition of Financial Assets:

The Company derecognizes a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

On derecognition of a financial asset accounted under Ind AS 109 in its entirety,

a) for financial assets measured at amortised cost, the gain or loss is recognized in the statement of profit and loss.

b) for financial assets measured at FVTOCI, the cumulative fair value adjustments previously taken to reserves are reclassified to the Statement of Profit and Loss unless the asset represents an equity investment in which case the cumulative fair value adjustments previously taken to reserves is reclassified within equity.

If the transferred asset is part of a larger financial asset and the part transferred qualifies for derecognition in its entirety, the previous carrying amount of the larger financial asset shall be allocated between the part that continues to be recognised and the part that is derecognised, on the basis of the relative fair values of those parts on the date of the transfer.

If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, it recognises its retained interest in the assets and an associated liability for amounts it may have to pay.

If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, it continues to recognise the financial asset and also recognises a liability for the proceeds received.

Modification/ revision in estimates of cash flows of financial assets:

When the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset in accordance with Ind AS 109, The Company recalculates the gross carrying amount of the financial asset and recognizes a modification gain or loss in statement of profit and loss.

Various quantitative and qualitative factors are considered to determine whether the renegotiated terms are substantially different and whether the same would amount to extinguishment of financial asset and recognition of a new financial asset. The gross carrying amount of the financial asset is recalculated as the present value of the renegotiated or modified contractual cash flows that are discounted at the financial asset's original effective interest rate. Any costs or fees incurred are adjusted to the carrying amount of the modified financial asset and are amortized over the remaining term of the modified financial asset.

(B) Financial Liabilities and Equity Instruments:

Equity Instruments:

An Equity Instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities.

Financial Liabilities:

Financial Liabilities are subsequently measured at amortised cost using the effective interest rate method.

Financial Guarantee Contracts:

Financial guarantee contracts issued by the Company are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of:

- the amount of loss allowance determined in accordance with impairment requirements of Ind AS 109; and
- the amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of Ind AS 115.

Derecognition of financial liabilities:

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in statement of profit and loss.

Fair value:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- a) In the principal market for the asset or liability, or
- b) In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are as follows:

- Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 - Other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 - Unobservable inputs for the asset or liability.

2.4 Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Company as lessor

Amounts due from lessees under finance leases are recognised as receivables at the amount of the Company's net investment in the leases. Assets given on operating leases are included in Property, Plant and Equipment.

Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

For the revenue recognition policy on Lease Contracts, refer note 2.2.

The Company as lessee

Assets held under finance leases are initially recognised as assets of the Company at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation. Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognised immediately in statement of profit and loss, unless they are directly attributable to qualifying assets, in which case they are capitalised in accordance with the Company's general policy on borrowing costs (see note 2.6 below). Contingent rentals are recognised as expenses in the periods in which they are incurred.

Operating lease payments are recognised as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed or the payments to the lessor are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred. In the event that lease incentives are received to enter into operating leases, such incentives are recognised as a liability. The aggregate benefit of incentives is recognised as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

2.5 Foreign Currency Transactions

The financial statements are presented in Indian Rupee (INR) in lakhs, being the functional currency of the Company. Functional currency is the currency of the primary economic environment in which the Company operates.

- Initial recognition of all transactions :
Recorded at the rates of exchange prevailing at the dates of the respective transactions.

- Conversion :

Foreign currency monetary items are restated using the exchange rate prevailing at the reporting date.

Non-monetary items (carried at fair value) as on reporting date are restated using the exchange rate prevailing at the date when the fair value was determined. Translation differences on such items are reported as part of the fair value gain or loss on such items.

For non-monetary items (carried at historical cost) as on reporting date restatement is not required

Foreign Exchange Gains and Losses:

Financial Assets:

The fair value of financial assets denominated in a foreign currency is determined in that foreign currency and translated using the exchange rate prevailing at the reporting date ..

- For monetary financial assets measured at amortised cost, FVTOCI or FVTPL and non-monetary financial assets measured at amortised cost or FVTPL, the exchange differences are recognised in the statement of profit and loss except for those which are designated as hedging instruments in a hedging relationship.
- Foreign currency changes for non-monetary financial assets measured at FVTOCI are recognised in other comprehensive income.

Financial Liabilities:

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated using the exchange rate prevailing at the reporting date .

For monetary financial liabilities measured at amortised cost, FVTOCI or FVTPL and non-monetary financial liabilities measured at amortised cost or FVTPL, the exchange differences are recognised in the statement of profit and loss except for those which are designated as hedging instruments in a hedging relationship. For financial liabilities that are measured as at FVTPL, the foreign exchange component forms part of the fair value gains or losses and is recognised in statement of profit and loss.

Foreign currency changes for non-monetary financial liabilities measured at FVTOCI are recognised in other comprehensive income..

2.6 Borrowing cost

Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds including interest expense calculated using the effective interest method.

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Other income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in statement of profit and loss in the period in which they are incurred.

2.7 Employee Benefits

(A) Retirement benefit costs and other termination benefits

Defined Contribution Plans:

Contributions to Provident Fund and Superannuation Fund are considered as defined contribution plans and are charged to the Statement of Profit and Loss based on the amount of contribution required to be made and when services are rendered by the employees

Defined Benefit Plans:

Gratuity Liability and Long Term compensated absences are defined benefit plans. The cost of providing benefits is determined in accordance with the advice of independent, professionally qualified actuaries, using the projected unit credit method.

Re-measurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Re-measurement recognised in other comprehensive income is reflected immediately in retained earnings and is not reclassified to statement of profit and loss. Past service is recognised in statement of profit and loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset. Defined benefit costs are categorised as follows:

- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- net interest expense or income; and

- re-measurement

The Company presents the first two components of defined benefit costs in statement of profit and loss in the line item 'Employee benefits expense'. Curtailment gains and losses are accounted for as past service costs.

The present value of the defined benefit plan liability is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds.

The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus in the Company's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

(B) Short-term and other long-term employee benefits:

A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.

Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service

Liabilities recognised in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date

2.8 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

Current tax

Current Tax is determined at the amount of tax payable in respect of taxable profit for the year as per the Income-tax Act, 1961. Taxable profit differs from 'profit before tax' as reported in the financial statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rate that has been enacted by the end of the reporting period.

MAT credit is recognized as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. In the year in which the MAT credit becomes eligible to be recognized as an asset, the said asset is created by way of a credit to statement of profit and loss and shown as MAT credit entitlement. The Company reviews the same at each balance sheet date and writes down the

carrying amount of MAT credit entitlement to the extent there is no longer convincing evidence to the effect that the Company will pay normal income tax during the specified period.

Deferred tax

The Company's deferred tax is calculated using tax rate that are substantially enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax for the year

Current and deferred tax are recognised in statement of profit and loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.9 Property, Plant and Equipment

Property, plant and equipment shown in the balance sheet are consists of assets used in operations. Assets used in operations are those used in the provision of services or for administrative purposes, and include assets leased by the Company as lessor under operating leases.

a) Initial and subsequent recognition

Property, plant and equipment are initially recognised at purchase price plus directly attributable costs, together with borrowing costs where a long period of construction or adaptation is required before the asset can be brought into service. Cost comprises the purchase price and any directly attributable cost of bringing the asset to its working condition for its intended use.

Subsequent to initial recognition, property, plant and equipment are measured at cost less accumulated depreciation and any impairment losses.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that the future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is de-recognised when replaced. All other repairs and maintenance are charged to statement of profit and loss during the reporting period in which they are incurred.

b) De-recognition

An item of property, plant and equipment is de-recognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in statement of profit and loss.

c) Depreciation

Depreciation of these assets commences when the assets are ready for their intended use. It is recognized so as to amortise the cost of assets (other than freehold land) less their residual values over their useful lives, using the straight-line method.

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Average useful life of the assets determined is as under:

Operating lease Assets

| Class of Assets | Useful Life as per the Companies Act 2013 | Useful Life as followed by the management |
|------------------------|---|---|
| Computers Equipment | 3 years/6 years | 5 years |
| Earth Moving Equipment | 9 years | 7 years |
| Motor Vehicles | 8 years | 7 years |
| Plant and Machinery | 15 years/30 years | 8 years/15 years |
| Windmill | 22 years | 20 years |

Own Use Assets

| Class of Assets | Useful Life as per the Companies Act 2013 | Useful Life as followed by the management |
|---------------------|---|---|
| Computer Equipment | 3 years/6 years | 5 years |
| Motor Vehicles | 8 years | 7 years |
| Plant and Machinery | 15 years/22 years | 8 years/22 years |

Management believes that the revised useful lives of the assets reflect the periods over which these assets are expected to be used.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets. However, when there is no reasonable certainty that ownership will be obtained by the end of the lease term, assets are depreciated over the shorter of the lease term and their useful lives.

Leasehold assets including improvements are amortised over estimated useful life or lease period, whichever is lower. Freehold Land is not depreciated.

Depreciation on assets purchased / sold during the period is recognized on a pro-rata basis.

2.10 Intangible Assets

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives.

The following useful lives are used in the calculation of amortisation.

Software: 5 years*

*Software includes license amortized over license life or 5 years whichever is earlier.

The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

An intangible asset is de-recognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from de-recognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in statement of profit and loss when the asset is de-recognised.

2.11 Impairment of tangible and intangible assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is

not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment on an annual basis, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in statement of profit and loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in statement of profit and loss.

2.12 Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

A provision for onerous contracts is recognised when the expected benefits to be derived by the Company from a contract are lower than the unavoidable cost of meeting its obligations under the contract. The provision is measured at the present value of the lower of the expected cost of terminating the contract and the expected net cost of continuing with the contract.

In case of litigations, provision is recognised once it has been established that the Company has a present obligation based on information available up to the date on which the Company's financial statements are finalised and may in some cases entail seeking expert advice in making the determination on whether there is a present obligation.

Contingent Liabilities

Contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. Company does not recognize contingent liability but discloses its existence in the financial statements.

Contingent Assets

Contingent assets are not recognized in the financial statement, but are disclosed where an inflow of economic benefits is probable.

2.13 Cash and cash equivalents

Cash and cash equivalents comprise of cash in hand and balances with banks, cheques on hand, remittances in transit and short-term investments with an original maturity of three months or less that are readily convertible to know amount of cash and which are subject to an insignificant change in value.

2.14 Segment Reporting

Operating Segments are reported in a manner consistent with the internal reporting provided to the Chief Operating decision maker. The Chief Operating decision maker assess the financial performance and position of the Company and makes strategic decisions.

As the Company is primarily engaged in providing asset finance to customers in India, there are no separate reportable segments as per 'Ind AS 108'.

2.15 Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

Diluted earnings per equity share is computed by dividing the net profit attributable to the equity holders of the company by the weighted average number of equity shares considered for deriving basic earnings per equity share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. The dilutive potential equity shares are adjusted for the proceeds receivable had the equity shares been actually issued at fair value (i.e. the average market value of the outstanding

equity shares). Dilutive potential equity shares are deemed converted as of the beginning of the period, unless issued at a later date. Dilutive potential equity shares are determined independently for each period presented.

2.16 Debt Redemption Reserve (“DRR”)

As per Rule 18(7)(b)(ii) of the Companies (Share Capital and Debentures) Rules, 2014 read with Section 71(4) of the Companies Act, 2013 in case of NBFC registered with the RBI under Section 45-IA of the RBI (Amendment) Act, 1997, no DRR is required to be created in the case of privately placed debentures, however in case of public issue of Non-Convertible debentures (NCD) ‘the adequacy’ of DRR will be 25% of the value of debentures issued through public issue.

However, as a matter of prudence, the Company, as per the management’s discretion, created DRR for redemption of privately placed subordinated debentures / loans qualifying for Tier I / Tier II Capital on a straight line basis over the tenure of the respective debenture / loans till 31st March, 2015. Thereafter from 1st April, 2015 in accordance with the aforesaid applicable rules, the Company has created DRR only for public issue of NCD’s.

2.17 Assets held for sale

Repossessed assets and assets acquired in satisfaction of debt are classified as held for sale if their carrying amount are recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the assets are available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets and its sale is highly probable. These assets are disclosed as part of ‘other non-financial assets’ and are carried at the lower of their carrying amount and fair value less costs to sell.

2.18 Offsetting Financial Instruments

Financial assets and liabilities are offset and the net amount is included in the Balance Sheet where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

2.19 Derivative financial instruments

The Company enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risks, including foreign exchange forward contracts, interest rate swaps and cross currency swaps. Further details of derivative financial instruments are disclosed in note to the financial statements.

Derivatives are initially recognised at fair value at the date the derivative contracts are entered into and are subsequently re-measured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in statement of profit and loss immediately unless the derivative is designated and effective as a hedging instrument, in

which event the timing of the recognition in statement of profit and loss depends on the nature of the hedging relationship and the nature of the hedged item.

2.20 Embedded derivatives

Derivatives embedded in non-derivative host contracts that are not financial assets within the scope of Ind AS 109 are treated as separate derivatives when their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at FVTPL.

2.21 Hedge Accounting

The Company designates certain derivatives, in respect of foreign currency risk and interest rate risk, as cash flow hedges. Hedges of foreign exchange risk on firm commitments are accounted for as cash flow hedges.

At the inception of the hedge relationship, the entity documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Company documents whether the hedging instrument is highly effective in offsetting changes in cash flows of the hedged item attributable to the hedged risk.

Cash flow hedges

The effective portion of changes in the fair value of the designated portion of derivatives that qualify as cash flow hedges is recognised in other comprehensive income and accumulated under the heading of 'cash flow hedge'. The gain or loss relating to the ineffective portion is recognised immediately in statement of profit and loss, and is included in the 'finance cost' line item.

Amounts previously recognised in other comprehensive income and accumulated in equity relating to (effective portion as described above) are reclassified to statement of profit and loss in the periods when the hedged item affects statement of profit and loss, in the same line as the recognised hedged item.

Hedge accounting is discontinued when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting. Any gain or loss recognised in other comprehensive income and accumulated in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in statement of profit and loss. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognised immediately in statement of profit and loss.

2.22 First Time Policy Choices

The Company has prepared the opening balance sheet as per Ind AS as of 1st April, 2017 (the transition date) by recognizing all assets and liabilities whose recognition is required by Ind AS, not recognizing items of assets and liabilities which are not permitted by Ind AS, by

reclassifying items from Previous GAAP to Ind AS as required under Ind AS, and applying Ind AS in measurement of recognized assets and liabilities. However, this principle is subject to the certain exception and certain optional exemptions availed by the Company as detailed below:

- De-recognition of financial assets and financial liabilities

The Company has applied the de-recognition requirements of financial assets and financial liabilities prospectively for transactions occurring on or after the transition date.

- Classification of financial instruments

The Company has determined the classification of instruments in amortised cost, FVTOCI and FVTPL based on the facts and circumstances that existed as of the transition date.

- Impairment of financial assets

The Company has applied the impairment requirements of Ind AS 109 retrospectively; however, as permitted by Ind AS 101, it has used reasonable and supportable information that is available without undue cost or effort to determine the credit risk at the date that financial instruments were initially recognized in order to compare it with the credit risk at the transition date. Further, the Company has not undertaken an exhaustive search for information when determining, at the date of transition to Ind ASs, whether there have been significant increases in credit risk since initial recognition, as permitted by Ind AS 101.

- Deemed cost for property, plant and equipment and intangible assets

The Company has elected to continue with the carrying value of all of its property, plant and equipment and intangible assets recognized as of 1st April, 2017 measured as per the Previous GAAP and use that carrying value as its deemed cost as of the transition date.

- Determining whether an arrangement contains a lease

The Company has applied Appendix C of IndAS 17 "Determining whether an Arrangement contains a lease" to determine whether an arrangement existing at the date of transition date contains a lease on the basis of facts and circumstances existed at that date.

- Equity investments at FVTPL

The Company has designated investment in equity shares at FVTPL on the basis of facts and circumstances that existed at the transition date.

2.23. Critical judgements in applying accounting policies

The following are the critical judgements, apart from those involving estimations, that the management have made in the process of applying the Company's accounting policies and that have the most significant effect on the amounts recognised in the financial statements:

- Expected credit loss on loans and advances

The Company has used its judgement in determining various parameters of expected credit loss. These parameters includes defining pools, staging, default, discount rates, expected life, significant increase in credit risk, amount and timing of future cash flows. In estimating these cash flows, the Company makes judgement about the realisable value of the securities hypothecated/mortgaged to it, based on the historical data and/or independent valuation reports.

These assumptions are based on the assumptions about a number of factors and actual results may differ, resulting in future changes to the impairment allowance.

A collective assessment of impairment takes into account data from the loan portfolio (such as credit quality, nature of assets underlying assets financed, levels of arrears, credit utilization, loan to collateral ratios etc.), and the economic data (including levels of unemployment, country risk and performance of different individual groups). These critical assumptions have been applied consistently to all period presented.

- Business Model Assessment

Classification and measurement of financial assets depends on the results of the SPPI and the business model test. The Company determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. The Company monitors financial assets measured at amortized cost or fair value through other comprehensive income that are derecognized prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Company's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets.

- Hedge Designation

The appropriateness of the designation of certain derivative instruments such as cash flow hedges, and the measurement of hedge effectiveness at the inception/origination of the transaction.

- Provisions other than expected credit loss on loans and advances

Provisions are held in respect of a range of future obligations such as employee entitlements, litigation provisions, etc. Some of the provisions involve significant judgement about the likely outcome of various events and estimated future cash flows. The measurement of these provisions involves the exercise of management judgements about the ultimate outcomes of the transactions.

- Fair value measurement

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, the Company engages third party qualified valuers to perform the valuations in order to determine the fair values based on the appropriate valuation techniques and inputs to fair value measurements, which involve various judgements and assumptions.

New standards and interpretations not yet adopted

In March 2019, the Ministry of Corporate Affairs (MCA) issued the Companies (Indian Accounting Standards) Amendment Rules, 2019 and the Companies (Indian Accounting Standards) Second Amendment Rules, 2019, notifying new standards and amendments to certain issued standards. These amendments are applicable to the Company from 1 April, 2019. The Company will be adopting the below stated new standards and applicable amendments from their respective effective date.

Amendment to Ind AS 12 'Income Taxes':

The amendment clarifies that an entity shall recognize income tax consequences of dividends in statement of profit and loss, other comprehensive income or equity according to where the entity originally recognised those past transactions or events. The amendment will come into force for accounting periods beginning on or after April 1, 2019.

Appendix C to Ind AS 12, Uncertainty over Income Tax Treatments:

The Appendix clarifies how to apply the recognition and measurement principles while recognizing current tax, deferred tax, taxable profits (losses), tax bases, unused tax losses, unused tax credits and tax rates when there is uncertainty over tax treatments under Ind AS 12. As per the Appendix, the Company needs to assess whether it is probable that a tax authority will accept an uncertain tax treatment used or a treatment which is being proposed to be used in its income tax filings. The Appendix will be applied retrospectively with the cumulative effect of its initial application on the opening balance sheet as on 1 April 2019.

Amendment to Ind AS 19 'Employee Benefits': On March 30, 2019, the Ministry of Corporate Affairs has notified limited amendments to Ind AS 19 'Employee Benefits' in connection with accounting for plan amendments, curtailments and settlements. The amendments require an entity to use updated assumptions to determine current service cost and net interest for the remainder of the period after a plan amendment, curtailment or settlement and to recognise in statement of profit and loss as part of past service cost, or a gain or loss on settlement, any reduction in a surplus, even if that surplus was not previously recognised because of the

impact of the asset ceiling. The amendment will come into force for accounting periods beginning on or after April 1, 2019, though early application is permitted.

Ind AS 116 'Leases':

Ind AS 116 replaces Ind AS 17 'Leases' and related interpretation and guidance. The standard sets out principles for recognition, measurement, presentation and disclosure of leases for both parties to a contract i.e., the lessee and the lessor. Ind AS 116 introduces a single lessee accounting model and requires a lessee to recognise assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. Currently, operating lease expenses are charged to the statement of profit and loss. The Standard also contains enhanced disclosure requirements for lessees. Ind AS 116 substantially carries forward the lessor accounting requirements as per Ind AS 17. Ind AS 116 is effective for annual periods beginning on or after April 1, 2019.

The Company is evaluating the effect of the above on its financial statements.

The Company's risk management strategy and how it is applied to manage risk are explained in Note 39.

* Under Ind AS 109, a hedging relationship only qualifies for hedge accounting if a number of restrictive criteria are satisfied, including appropriate designation and documentation of effectiveness at inception of the hedge. A hedging relationship will only qualify for hedge accounting at the date of adoption (being April 1st, 2018) if the hedging relationship has been fully designated and documented as effective in accordance with Ind AS 109 on or before the date of adoption and is of a type that qualifies for hedge accounting under Ind AS 109. Designation of a hedging relationship cannot be made retrospectively. Hence, all derivatives entered prior to April 1st, 2018 has been classified as undesignated derivative.

5.1 The following table details the derivative financial instruments as held for hedging and risk management purpose (cash flow hedging) outstanding at the end of the reporting period

| Outstanding Contracts | Notional amounts | Timing | | | | Average Exchange Rate # |
|-------------------------|------------------------|--------------------|---------------|--------------------|------------------|-------------------------|
| | (₹ in lakhs) | | | | | |
| | As at March 31st, 2019 | Less than 3 months | 3 to 6 months | 6 months to 1 year | More than 1 year | |
| Spot and forwards - USD | 4,179 | 720 | 1,983 | 426 | 1,050 | 72.90 |

Average exchange rate includes forward premium charge.

Spots and Forwards

There is an economic relationship between the hedged item and the hedging instrument as the terms of the forward contract match that of the foreign currency liabilities (notional amount, repayment date etc.). The Company has established a hedge ratio of 1:1 for the hedging relationships as the underlying risk of the forward contracts are identical to the hedged risk components.

Interest Rate Swaps

There is an economic relationship between the hedged item and the hedging instrument as the terms of the Interest Rate swap contract match that of the foreign currency borrowing (notional amount, interest repayment date etc.). The Company has established a hedge ratio of 1:1 for the hedging relationships as the underlying risk of the interest rate swap are identical to the hedged risk components.

a. In determining the allowances for credit losses of trade receivables, the Company has used a practical expedient by computing the expected credit loss allowance for trade receivables based on a provision matrix. The provision matrix takes into account historical credit loss experience. The expected credit loss allowance is based on the ageing of the receivables that are due and rates used in the provision matrix.

ii. Movements in Expected Credit Losses Allowance is as below:

35. Employee Benefits

Defined benefit plans

(A) Gratuity Fund :-

The Company makes periodic contributions to the Srei Equipment Finance Limited Employee Gratuity Fund, a funded defined benefit-plan for qualifying employees. The trustees of the gratuity scheme for the employees of the Company have entrusted the administration of the scheme to the Life Insurance Corporation of India (LIC). The plan provides for a lump-sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount equivalent to 15 days salary payable for each completed year of service. Vesting occurs upon completion of five years of service. The Company makes annual contributions to gratuity funds established as trusts or insurance companies. The Company accounts for the liability for gratuity benefits payable in the future based on an actuarial valuation.

Risk Management

The Defined Benefit Plans expose the Company to risk of actuarial deficit arising out of interest rate risk, salary cost inflation risk and demographic risk.

(a) Interest rate risk : The defined benefit obligation calculated uses a discount rate based on government bonds. If bond yields fall, the defined benefit obligation will tend to increase.

(b) Salary Inflation risk : Higher than expected increases in salary will increase the defined benefit obligation.

(c) Demographic risk : This is the risk of variability of results due to unsystematic nature of decrements that include mortality, withdrawal, disability and retirement. The effect of these decrements on the defined benefit obligation is not straight forward and depends upon the combination of salary increase, discount rate and vesting criteria. It is important not to overstate withdrawals because in the financial analysis the retirement benefit of a short career employee typically costs less per year as compared to a long service employee.

The most recent actuarial valuation of plan assets and the present value of the defined benefit obligation was carried out as at March 31st,2019

NOTES TO THE FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED MARCH 31ST, 2019

Note 37: First Time Adoption

Ind AS 101 "First-time Adoption of Indian Accounting Standards" provides a suitable starting point for accounting in accordance with Ind AS and is required to be mandatorily followed by first-time adopters. The Company has prepared the Opening Balance Sheet as per Ind AS as of 1st April, 2017 (the transition date) by:

- a. recognising all assets and liabilities whose recognition is required by Ind AS
- b. not recognising items of assets or liabilities which are not permitted by Ind AS
- c. reclassifying items from previous Generally Accepted Accounting Principles (Previous GAAP) to Ind AS as required under Ind AS, and
- d. applying Ind AS in measurement of recognised assets and liabilities

Ind AS 101 allows first-time adopters certain exemptions from the retrospective application of certain requirements under Ind AS

The Company has applied for the following exemptions

(i) Estimates

The estimates at 1st April 2017 and at 31st March 2018 are consistent with those made for the same dates in accordance with Previous GAAP (after adjustments to reflect any differences in accounting policies).

The estimates used by the Company to present these amounts in accordance with Ind AS reflect conditions at 1st April 2017 and as of 31st March 2018.

(ii) Classification of Financial Assets

The classification of financial assets to be measured at amortized cost or at fair value through Profit and Loss is made on the basis of facts and circumstances that existed on the date of transition to Ind AS.

(iii) Fair value at Deemed Cost for items of Property, Plant and Equipment and Intangible asset

The Company has elected to use the carrying amount of items of Property, Plant and Equipment and Intangible asset under previous GAAP on the date of transition to Ind AS as deemed cost for Ind AS.

SREI EQUIPMENT FINANCE LIMITED
NOTES TO THE FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED MARCH 31ST, 2019

Note 37: First Time Adoption (continued)

Footnotes to the reconciliation of equity as at March 31st, 2018 and April 1st, 2017 and Total Comprehensive Income and Statement of Cash Flows for year ended March 31st, 2018.

(i) Measurement of financial assets and financial liabilities at amortised cost

Under Previous GAAP, all financial assets and financial liabilities were carried at cost. Under Ind AS, certain financial assets and financial liabilities are subsequently measured at amortised cost which involves the application of effective interest method. In applying the effective interest method, an entity identifies fees that are an integral part of the effective interest rate of a financial instrument. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability to the gross carrying amount of the financial asset or financial liability.

(ii) Expected Credit Loss

Under Previous GAAP, the impairment provisioning for the company were governed by the principles as prescribed by the RBI through NBFC-SI directions.

Under Ind AS, a loss allowance for expected credit losses is recognised on financial assets carried at amortized cost. Expected credit losses (with the exception of purchased or original credit-impaired financial assets) are required to be measured through a loss allowance at an amount equal to the 12 month expected credit losses; or Lifetime expected credit losses if credit risk has increased significantly since initial recognition of the financial instrument.

(iii) Gain from excess interest spread on assignment transactions

Under previous GAAP, since the assignment transactions were carried out at book value of the loan assets with no upfront cash profit/loss, no gain/loss on the said transaction has been recognised on the same. Under Ind AS, gains from excess interest spread is recognised upfront.

(iv) Measurement of financial assets at fair value through Profit or Loss (FVTPL)

Under previous GAAP, financial assets were stated at cost. Under Ind AS, if the contractual terms of the financial asset give rise on specified dates to cash flows that are not solely payments of principal and interest on the principal amount outstanding, the entity shall measure the fair value of the financial instrument with changes thereof to the statement of Profit and Loss.

Similarly, under previous GAAP, non-current investments were stated at cost. Where applicable, provision was made to recognise a decline, other than temporary, in valuation of such investments. Under Ind AS, equity instruments have been classified as Fair Value through Profit or Loss (FVTPL) on the date of transition and changes in fair value after the date of transition has been recognised in profit or loss.

(v) Measurement of derivative financial instruments at fair value

The Company uses derivative financial instruments, such as currency forwards, options and swaps to hedge its foreign currency risks. Under previous GAAP, these instruments were accounted for in accordance with principles specified under AS-11, whereby the premium or discount arising at the inception of such derivative contracts were amortized as expense or income over the life of the contract and any charge payable in respect of such foreign exchange contracts were recognized over the terms of the contract. Exchange differences on such contracts were recognized in the Statement of Profit and Loss in the period in which the exchange rates change.

The Company uses derivative financial instruments, such as cross currency swaps and interest Rate Swaps for hedging the interest rate risk. Under previous GAAP, as per Guidance Note on Accounting for Derivative Contracts issued by ICAI, the net mark to market losses or gains on the outstanding portfolios of such instruments were recognised directly in cash flow hedges.

Under Ind AS, changes in the fair value of all derivative financial instruments on adoption date has been routed through retained earnings. The changes in fair value of derivative financial instruments, after adoption date, which are designated as cash flow hedges are recognised in equity. Amounts deferred in equity are transferred to the Statement of Profit and Loss in line with the hedged transaction.

(vi) Re-measurement Gains and Losses on Defined Benefit Plans

Under previous GAAP, actuarial gains and losses related to the defined benefit schemes for gratuity and liabilities towards employee compensated absences were recognised in statement of profit and loss. Under Ind AS, the actuarial gains and losses form part of remeasurement of the net defined benefit liability/asset which is recognised in OCI. Consequently, the tax effect of the same has also been recognised in OCI instead of statement of profit and loss.

(vii) Tax Impact on above adjustments

The above adjustments have led to recognition of deferred taxes on new temporary differences.

(viii) The Company transfers loan assets under securitisation arrangements to banks and financial institutions. Some of the arrangements do not meet the de-recognition criteria due to credit enhancement being provided to the banks and financial institutions. Consequently, proceeds received from such transactions are recorded as collateralised borrowings and loan assets continue to be recognised in the financial statements. Under the Previous GAAP, such transactions were de-recognised and recorded as a sale.

(ix) The adjustments are due to regrouping of sale or purchase of investments from operating activities to financing activities. As a result, cash flow from operating activities under Ind AS is higher and cash flow from investing activities is lower.

SREI EQUIPMENT FINANCE LIMITED**NOTES TO THE FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED MARCH 31ST, 2019****38. CAPITAL MANAGEMENT**

The primary objectives of the Company's capital management policy are to ensure that the Company complies with externally imposed capital requirements and maintains strong credit ratings and healthy capital ratios in order to support its business and to maximise shareholder value.

The Company manages its capital structure and makes adjustments to it according to changes in economic conditions and the risk characteristics of its activities. In order to maintain or adjust the capital structure, the Company may adjust the amount of dividend payment to shareholders, return capital to shareholders or issue capital securities. No changes have been made to the objectives, policies and processes from the previous years. However, they are under constant review by the Board.

Below are the methodologies and assumptions used to determine fair values for the above financial instruments which are not recorded and measured at fair value in the Company's financial statements. These fair values were calculated for disclosure purposes only. The below methodologies and assumptions relate only to the instruments in the above tables

Loans measured at amortised cost

The fair values of loan assets are estimated using a discounted cash flow model based on contractual future cash flows based on terms, discounted at a rate that reflects market risks..

Other financial assets measured at amortised cost

For other financial assets that have a short-term maturity (less than twelve months), the carrying amounts, which are net of impairment, are a reasonable approximation of their fair value.

Such instruments majorly include: cash, cash equivalents, other bank balances, Trade and Other receivables and Security Deposits.

Debt Securities, Subordinated Liabilities and Other Borrowings measured at amortised cost

The fair values of debts are estimated using a discounted cash flow model based on contractual future cash flows based on terms, discounted at a rate that reflects market risks..

Other financial liabilities measured at amortised cost

For other financial liabilities that have a short-term maturity (less than twelve months), the carrying amounts are a reasonable approximation of their fair value.

Such instruments majorly include: Trade & Other payables and Trade Deposits .

39. FINANCIAL INSTRUMENTS AND RELATED DISCLOSURES (continued)

B. Fair value hierarchy

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Level 1 to Level 3, as described below:

Quoted prices in an active market (Level 1): Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments that have quoted price. The fair value of all equity instruments which are traded in the stock exchanges is valued using the closing price as at the reporting period.

Valuation techniques with observable inputs (Level 2): The fair value of financial instruments that are not traded in an active market (for example over-the counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Valuation techniques with significant unobservable inputs (Level 3): If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities included in level 3.

(i) Mark-to-Market

Fair value of the asset and liability has been estimated using the current market price, or price for similar assets and liabilities as applicable.

(ii) Income Approach.

The discounted cash flow method was used to capture the present value of the expected future benefits (including contractual cashflows) to be derived from the Loan Assets/Other Financial Assets.

(iii) Quoted Prices.

Quoted bid prices of an active market was used.

(iv) Price to Revenue/Earnings Multiple Method

Price was derived as a multiple of revenue/earnings based on relevant information from companies operating in similar economic environment and industry.

(v) Discount rate, determined using the cost of lending of the company.

Sensitivity of fair value measurements to changes in unobservable market data

The table below describes the effect of changing the significant unobservable inputs to reasonable possible alternatives. Sensitivity data are calculated using a number of techniques, including analysing price dispersion of different price sources, adjusting model inputs to reasonable changes within the fair value methodology.

The ranges are not comparable or symmetrical as the model inputs are usually not in the middle of the favourable/unfavourable range.

Below table shows impact of increase/decrease in fair valuation measurement at 2%

39. FINANCIAL INSTRUMENTS AND RELATED DISCLOSURES (continued)

C) Financial risk management objectives

The Company's activities expose it to market risk, liquidity risk and credit risk.

The Company has an independent and dedicated Enterprise Risk Management (ERM) system to identify, manage and mitigate business risks.

Board has approved the Asset Liability Management Policy and the formation of Asset Liability Management Committee (ALCO). The ALCO includes the Company's senior management. It defines the strategy for managing liquidity and interest rate risks in the business.

a) Market risk

The Company's Financial Instruments are exposed to market changes. The Company is exposed to the following significant market risk:

- i. Foreign Currency Risk
- ii. Interest Rate Risk
- iii. Other Price Risk

i. Foreign currency risk

The Company undertakes transactions denominated in foreign currency which results in exchange rate fluctuations. Such exchange rate risk primarily arises from transactions made in foreign exchange and reinstatement risks arising from recognised assets and liabilities, which are not in the Company's functional currency (Indian Rupees).

The Company has entered into Spots, Forwards and Currency Swaps to manage its foreign currency risk. Hence, the Company's profit and loss and equity is not exposed to such foreign currency sensitivity.

ii. Interest rate risk

The Company is exposed to interest rate risk as the Company borrows funds at both fixed and floating interest rates. The Company manages the risk by maintaining an appropriate mix between fixed and floating rate borrowings, and by use of interest rate swaps and cross currency interest rate swaps. Hedging activities are evaluated to align with interest rate views and defined risk appetite, to deploy the most cost effective hedging strategies.

The company is further exposed to interest rate risk as the company also lends funds at floating interest rates.

Others primarily include EUR-EURO, GBP-Great Britain Pound and SGD-Singapore Dollar

In some cases, the Company has entered into cross currency swap and interest rate swaps to manage its interest rate risk. The Company's profit and loss and equity is not exposed to interest rate sensitivity to that extent.

The sensitivity analysis above has been determined based on the exposure to interest rates for assets and liabilities at the end of the reporting period. For floating rate assets and liabilities, the analysis is prepared assuming the amount of the liabilities/assets outstanding at the end of the reporting period was outstanding for the whole year and the rates are reset as per the applicable reset dates.

iii. Price risk

Equity price risk is related to change in market reference price of investments in equity securities held by the Company. The fair value of quoted investments held by the Company exposes the Company to equity price risks. In general, these investments are not held for trading purposes. The fair value of quoted investments in equity, classified as fair value through Profit & Loss as at March 31st, 2019 is ₹ 297 Lakhs (March 31st, 2018 ₹ 959 Lakhs, April 1st, 2017 ₹ 1,326 Lakhs)

A 10% change in equity prices of such securities held as at March 31st, 2019, March 31st, 2018 and April 01st, 2017, would result in an impact of ₹ 30 Lakhs (31st March 2018 ₹ 96 Lakhs, 1st April 2017 ₹ 133 Lakhs).

b) Liquidity risk

Liquidity Risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset.

The Company's treasury maintains flexibility in funding by maintaining sufficient cash and marketable securities and the availability funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions.

The Company's Asset Liability Management Committee (ALCO) lays down a broad framework for liquidity risk management to ensure that it is in a position to meet its daily liquidity obligations as well as to withstand a period of liquidity stress from industry, market or a combination of them. The liquidity profile is analyzed on a static as well as on a dynamic basis by using the gap analysis technique supplemented by monitoring of key liquidity ratios and conduct of liquidity stress tests periodically.

This includes working capital facilities considered in over 6 months and upto 1 year bucket based on contractual terms, however, as per the prevalent practice, these facilities are renewed on a year to year basis and therefore, are revolving in nature.

c) Credit risk

The principal business of the company is to provide financing in the form of loans to its clients primarily to acquire assets. Credit Risk is the risk of default of the counterparty to repay its obligations in a timely manner resulting in financial loss. The Company also provides Leasing services to its clients which result in accrual of Trade Receivables. The Company is exposed to credit risk to the extent of such Trade Receivables. Credit risk encompasses both the direct risk of default and the risk of deterioration of creditworthiness as well as concentration risks. The Company has credit policies approved by the Board which lays down the credit evaluation and approval process in compliance with regulatory guidelines.

The Company uses the Expected Credit Loss (ECL) Methodology to assess the impairment on both loan assets and trade receivables. The Company has bucketed its portfolio according to Exposure Amounts, as the same reflects similar customer behaviour, and the Probability of Default (PD) of each of the buckets is computed basis such historical data. Basis the historical data, the company has computed the realisable value of the securities hypothecated to it and thus derived the Loss Given Default (LGD). The combination of the PD and LGD is applied on the Exposure at Default to compute the ECL provision, which is further adjusted for forward looking information, if any. Additionally, the Company reviews its large exposures on quarterly basis to identify cases where the expected credit loss is expected to be higher than that derived from the model and recognises such impairments additionally.

The Company's Loan and trade receivables consists of a large number of customers, hence the Company is not exposed to concentration risk with respect to any particular customer.

SREI EQUIPMENT FINANCE LIMITED**NOTES TO THE FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED MARCH 31ST, 2019****39. FINANCIAL INSTRUMENTS AND RELATED DISCLOSURES (continued)****D) Transfers of financial assets that are not derecognised in their entirety :**

The Company has carried out securitisation transactions wherein it has securitised loans. Even though the loan assets have been securitised, the Company still holds the right (legal as well as contractual) to recover the entire overdue balance in respect of these loan assets. Further, the returns are dependent on the realisation from the securitised loan assets, leading to company bearing the risk of non-realisation from the pool.

D.1. The table below outlines the carrying amounts and fair values of all financial assets transferred that are not derecognised in their entirety and associated liabilities.

40. Assets obtained by taking possession of collateral/assets

The Company has obtained certain non-financial assets during the year by taking possession of collaterals or underlying assets on default by the party. The Company's policy is to determine whether a repossessed asset can be released back to the customer or should be sold. Assets which are identified for sale are classified as assets held for sale at their fair value or carrying value, whichever is lower. The Company's policy is to realise collateral on a timely basis.

The table below outlines the nature and values of assets held for sale obtained during the year and where still lying with the company as at the year end:

Figures in bracket indicate previous year's figures i.e. as on March 31st, 2018

Note :

The maturity pattern of working capital facilities including buyer's credit facilities, aggregated outstanding value being ₹ 9,30,692 Lakhs as at March 31st, 2019 (₹ 8,98,012 Lakhs as at March 31st, 2018), sanctioned by the banks has been apportioned in proportion to the maturity pattern of the advances. It may be noted that out of above working capital facilities, contractually cash credit facilities amounting to ₹ 6,80,692 Lakhs (previous year: ₹ 2,68,374 Lakhs) falls due within 1 year from the balance sheet date, while in respect of Working Capital Demand Loan (WC DL) amount of ₹ 30,000 Lakhs (previous year: ₹ 3,23,500 Lakhs) falls due within 'upto 30/31 days'; amount of ₹ 1,45,500 Lakhs (previous year: ₹ 1,54,500 Lakhs) falls due 'over 1 month but upto 2 months'; amount of ₹ 4,500 Lakhs (previous year: ₹ 1,09,500 Lakhs) falls due 'Over 2 months upto 3 months' and amount of ₹ 70,000 Lakhs (previous year: ₹ 1,500 Lakhs) falls due 'Over 3 months & upto 6 months' from the balance sheet date and in respect of Buyers' credit facilities amount of ₹ Nil (previous year: ₹ 4,946 Lakhs) falls due within 'upto 30/31 days'; amount of ₹ Nil (previous year: ₹ 2,160 Lakhs) falls due 'over 1 month but upto 2 months'; amount of ₹ Nil (previous year: ₹ 3,563 Lakhs) falls due 'Over 2 months upto 3 months'; amount of ₹ Nil (previous year: ₹ 8,367 Lakhs) falls due 'Over 3 months & upto 6 months' and amount of ₹ Nil (previous year: ₹ 21,601 Lakhs) falls due 'Over 6 months & upto 1 year' from the balance sheet date. However, these working capital facilities have been subsequently renewed for a year after the balance sheet date.

The RBI in its inspection report under section 45N of the RBI Act, 1934, for the year ended March 31st, 2017 have stated that the working capital facilities are short term in nature and that their renewal on a year on year basis should not be considered for arriving at their residual maturity. However, the Company is of the opinion that the basis adopted by the Company is appropriate and consistent with the past practice and this matter is under further discussion with the RBI.

25. Disclosures on Risk Exposure in Derivatives

(i) Qualitative Disclosure

Asset Liability Committee (ALCO) manages the Foreign Currency and Interest Rate Risks, besides other market risks / core functions. The company has put in place the policies for hedging / mitigating risks / strategies and processes for continuous monitoring of risks, which will enable the company to quantify risk, both on account of Foreign Currency and Interest Rate Risks. Apart from ALCO there is a Risk Committee of the Board which guides the company in these risks. Risk is measured on the basis of Fair Value as on reporting date. The Board has delegated authority to company officials in the Treasury department for entering into Generic derivative products besides Forward Contracts, on behalf of the company, to hedge the Foreign Currency and Interest Rate Risk exposures. The company has a Risk Management Policy which paves the way for risk reporting and risk monitoring systems. The marked-to-market values are obtained from the banks with whom the hedge deals are done. The Company, in order to hedge itself against the adverse impact of fluctuations in foreign currency rates / variable interest benchmark (LIBOR) on underlying liability, enters into the derivative contracts. The Company does not enter into derivative contracts for speculation or trading purposes.
